

**Redgwick and Banke, Inc. needed a machine
to load double bottom trailers in one pass
...Bud Johnson showed them how.**

Loading dirt from a building site in Castro Valley into 25 ton capacity double bottom dump trailers is no problem.

Unless you want to do it in one pass per trailer. Redgwick and Banke, Inc. did.

The problem was presented to the Peterson engineering group and a machine was carefully selected. Their choice was a Cat 988 equipped with a specially designed 119" wide Bonus Bucket to handle the job's requirements.

Working with a Cat D9G and a D8H to keep an adequate stockpile, the 988 was able to maintain a continual production pace with only one pass per trailer; a total truck load and position time of only 1.05 minutes for each truck.

An enviable record.

But it figures... Bud Johnson is part of the Peterson team of men who really know equipment. He's on your team too. Ask him.

H. A. Redgwick and G. P. Banke owners of Redgwick and Banke, Inc.
